## SEE NEW YORK FROM PARIS

PARIS, May 18.—M. Armengaud, a clever French engineer and scientist, who for years has been experimenting with an invention known as the "telescope" or "telephoto" intended to extend the range of human vision to extraordinary distances, says that he has so far perfected his apparatus that he can now foretell that the time is not far distant when a man sitting in Paris or London will be able to see what is going on in New York.

The inventor says that in the past few months he has made remarkable progress toward the realization of this fascinating idea. His apparatus is like the machine employed by Professor Korn for the telegraphic transmission of photographs. He utilizes the properties of selenium, and his method was inspired by the cinematograph.

## HARD BLOW TO FAKE MEDIUMS

NEW YORK, May 18.—Spiritualism received a hard rap today when Hereward Carrington, assistant of Dr. James H. Hyslop, head of the Society for Psychical Research, made public an exposure of the famous camp at Lily Dale, N. Y., where hundreds of prominent people have gone to hold converse with the spirits of the dead.

Carrington spent two weeks at Lily Dale in disguise, living with alleged mediums, attending their seances in the pose of a credulous believer and carrying on an elaborate secret investigation which, he declares, resulted in proving every medium whose sittings he attended to be a faker.

"I went to Lily Dale under the name of Charles Henderson, and visited nearly every medium of prominence there. Among others I exposed was Pierre L. O. A. Keeler of Washington, one of the most famous of the business."

Besides investigating slate writing and dematerialization, Carrington had a spirit photograph taken, supposed to represent the face of a dead relative, which he recognized as being cut out of a current magazine and doctored up with a view to conceal its identity.
